Risk Identified	Initial Risk Level (H, M, L)	Actions to Lower Risk	New Risk Level (H, M, L)
Hitting someone with a boom mic	L	we would have to make sure that whoever is using the boom mic is more careful and can handle the weight of the mic so it doesn't hit anyone that would be recorded.	L
Camera/equiptment	L	the camera can brake if some one is not careful, to lower this risk we would have to make sure that whoever is using the camera/equipment is more careful using it.	L
slip, trips and falls	М	Wires can be hanging out and people can trip over. To lower the risk we can hide most of the wire by putting something on top of the wires.	L
pitch	М	if it's raining you can slip in the pitch. In order to make the risk lower we can wait till the rain to stop.	L
falling over own shoe/shoe lace.	L	Make sure that you tie your shoes up/strap your shoes up so that you don't fall and possible brake your bones or equipment.	L
